

## Technical rider GrGr

I need:

- a small table (about 90x65x90 cm) for my equipment
- monitor speakers on stage
- 2 jack cables (6,35 mm) 3-5 m length
- 2 XLR cables, 3-5 m
- 1 mono DI Box
- a guitar stand on stage
- 1 mic (sm58) + microphone stand + long XLR cable for the mic (i will move through the audience during the performance - if possible)
- 4 channels:
  - 1/2: stereo out from my mixer
  - 3: voice (if possible: some reverb, small delay)
  - 4: guitar

(If there are only 2 channels free I can use my own mixer for voice and guitar)

Thank you!
